- 1 Intro
 - 1.1 Thanks
 - 1.2 Legal stuff
 - 1.3 Meta info: What Where How
 - 1.4 Completeness: How complete is this faq?
 - 1.5 Contributing to the FAQ
- 2 What is Sane?
 - 2.1 Intro
 - 2.2 What is a SANE frontend ?
 - 2.3 What is a SANE backend ?
 - 2.4 Is my-favorite-scanner supported by SANE ?
 - 2.5 Why is my-favorite-scanner NOT supported by SANE ?
 - 2.6 My scanner is "TWAIN Compatible". Why isn't SANE "TWAIN compatible" ?
 - 2.7 Is there support from scanner-vendors?
 - 2.8 The backend for my-favorite-scanner is available, but for a different type.Can I use a USB<->PARALLEL / SCSI<->PARALLEL convertor ?
 - 2.9 Is there any plan to add SANE support for my-favorite-unsupported-scanner ?
 - 2.10 Can I connect more than one scanner to a single system? Can I use them both at the same time?
 - 2.11 How can I help ?
 - 2.12 How can I access a SANE backend from Windows throught the network ?
 - 2.13 How can I access a scanner connected to a Windows box from a SANE frontend throught the network ?
 - 2.14 Mailing-list, IRC
 - 2.15 What are all these "Formulardaten" sent to this list from kundenserver.de?
 - 2.16 Is there a quick step-by-step procedure or a How-To?
 - 2.17 This all sounds scary! Do I have any other options?
- 3 Buying a scanner
 - 3.1 What scanner should I buy?
 - 3.2 Which HP scanners are supported?
 - 3.3 Are all Epson scanners supported?
 - 3.4 What about ADF-scanners?
- 4 How do I install
 - 4.1 How do I get SANE?
 - 4.2 OK, I downloaded the sources. What's next?
 - 4.3 Why do I have to compile everything? Why are there no binary distributions?
 - 4.4 I use redhat 8.0 and I keep my system updated, and network scanning suddenly stopped working (device busy)
 - 4.5 Where is everything?
 - 4.6 Xsane: make stops with /bin/sh: no: command not found
 - 4.7 I can't compile SANE on my-favorite-OS. What can I do ?
 - 4.8 Can I use xsane with GIMP 2?
 - 4.9 ERROR: SANE is needed for compiling sane-frontends
 - 4.10 The xsane-config-script refuses to make a GIMP-plugin
 - 4.11 Errors including SCSI-headers.
 - 4.12 Compling Sane aborts with xscanimage.c:63: parse error before 'GParam'
 - 4.13 I want to do a clean installation. How do I get rid of all the older versions?
 - 4.14 I want only one backend. Must I compile the others?
- 5 It doesn't work
 - 5.1 It does not work; basic problem searching.
 - 5.2 I compiled SANE, but my scanner doesn't show in the device list or no Device selection dialog appears.
 - 5.3 Permissions: As root it works, but not for ordinary people

- 5.4 Sane hangs or crashes when I start a frontend for sane, what can I do?
- 5.5 Scanimage gives a message "Invallid argument"
- 5.6 I changed the dll.conf or other configuration files but nothing has changed
- 5.7 I need more technical information for Linux
- 6 Scanner specifics
 - 6.1 HOW TO do my scanner
 - 6.2 I need more information on HP scanners.
 - 6.3 Snapscan problems
 - 6.4 I can't get my USB snapscan to work. Where can I find more info?
 - 6.5 Microtek problems
 - 6.6 It gives a line: "model 0x53 not supported" (or other number)
 - 6.7 Epson
 - 6.8 How to install the Epson Cx3200 scanner device without recompiling the whole kernel.
 - 6.9 UMAX problems
 - 6.10 After system boot, my scanner makes a fast loud clicking noise
 - 6.11 I can't get the scanner to work with the SCSI-interface that comes by default with this scanner
 - 6.12 Will there be a support for the UMAX-parallel-port/UMAX-USB-scanners?
 - 6.13 Does SANE and the umax backend work on LinuxPPC / big endian machine ?
 - 6.14 I am using an AM53C974 based scsi card with a umax scanner, the system freezes when I start a scan, what can I do?
- 7 . SCSI problems
 - 7.1 What SCSI-card should I buy?
 - 7.2 What about the SCSI-card I got with my scanner?
 - 7.3 AM53c/974 problems (o.a. Tekram DC390, DawiControl 2974)
 - 7.4 SCSI kernel/modules blues
 - 7.5 Linux 2.4-kernel problems or Mandrake 8.0
 - 7.6 SCSI bus problems: it works sometimes/almost never/partially
 - 7.7 I'm using IDE over SCSI and I keep getting IO-error under xsane.
 - 7.8 My scanner was off during reboot. Do I have to boot again to get my scanner to work?
- 8 Paralel port scanners
 - 8.1 Where can I find more information on paralel port scanners?
 - 8.2 My scanner does SCSI over the parallel port. How do i set this up?
 - 8.3 Any other hints if it doesn't work?
 - 8.4 What is the difference between sane-find-scanner and scanimage -L?
- 9 USB Problems
 - 9.1 Is there a how-to or some general information on USB-scanners?
 - 9.2 How can I use a USB scanner with Linux 2.6?
 - 9.3 Should I use "libusb" or the scanner.o module?
 - 9.4 What module should I load in Linux for my scanner?
 - 9.5 How can I avoid having to 'modprobe scanner' after each boot?
 - 9.6 Should I make a link /dev/scanner -> /dev/usbscanner
 - 9.7 On my Linux 2.4.16-kernel, the scanner causes a system-freeze
 - 9.8 Using the "alternate" uhci kernel driver, scanning works but is much slower than it was before.
 - 9.9 USB hardware problems.
- 10 Network-scanning
 - 10.1 Is there a "howto" for saned?
 - 10.2 It doesn't work; can you give me some hints?
 - 10.3 Xinetd on RedHat reports: access by user@(null) rejected.
 - 10.4 Network scanning: after some time Xsane (gimp-plugin, xsacnimae etc) crashes.
 - 10.5 Is there documentation how to use SANE on a server with Windows clients?
 - 10.6 Saned doesn't work from inetd, but it works from command line, with a Samsung
- 11 I can make a scan! Great, what's next?

- 11.1 Do you have some scanning-tips for me?
- 11.2 Jpeg, png, pnm and so-on. What does that mean?
- 11.3 Many options in scanimage are inactive. Can I activate them?
- 11.4 It used to work, but after some changes in setup I keep getting wrong color/gamma/brightness etc.
- 11.5 The backend supports only 8 and 12 bits but my scanner can use a color depth of 24 bits!
- 11.6 Xsane does not support my favorite fileformat. What now?
- 11.7 I need a multi-page scan and xsane only produces single-page scans
- 11.8 Everything works, except the FAX-option
- 11.9 Tell me about Resolution, Gamma, Brightness and Contrast
- 11.10 When scanning repeated patterns, I get strange (other) patterns
- 11.11 Are there any OCR-packages available?
- 11.12 Can SANE help archive my pictures, documents etc..

Contents
